Were any HQ offices outside of OPP or regions asked for comments, kaythi?

Good Afternoon Kaythi,

Can you fill everyone in on the status of the rodenticide brochure? I know it was distributed at the public health workers conference, but last I recall it was still being reviewed in "pro-trac" and we addressed some comments by the press office or AA office.

Thanks,
Rusty

Hi Kathy,

I'm just back and am swimming through a lot of emails and haven't focused on your earlier emails yet.

Rusty and Kaythi worked on this brochure and had quite a bit of input from the press office and the AA's office before it was handed out at the public health workers conference.

I believe the idea is to use it as a springboard for drafting some sort of magazine article which has not been done yet. I'm sure that we'd welcome input from you and others in OCHP, but I think that it would be best to include Rusty in the initial conversation about it. He can tell you much more about it than I can. He is back next week and we will set something up with you.

Thanks,
Laura

Regulations and Labels (article)

Hi, Laura -

Not sure if you're back form the holidays yet but wanted to ask: Has this brochure been printed? If not, do you want comments on it?

I have some -- and would be happy to coordinate comments from others in OCHP and our regional CH coordinators. It would be easier to provide if the text were in MS Word so i can comment in track changes...

Hi Kathy,

I would like to brainstorm with you a little about outreach on the rodenticide issues. We'd like to let the public know that there are safer, effective products on the market now. Maybe we could update the Healthy Homes Work Group? Or provide them with links to our information?

Can you call me at your convenience next week to talk? Our holiday party is tomorrow and I'm compressed on Friday, but I'm in Mon-Wed of next week.

It would be good to work with you on this once again.

Thanks,
Laura

Thanks, Neil. I forwarded your note to my OD. We're definitely interested in engaging on this issue and providing whatever help or support you need to get these products off the market. We can also help with outreach esp in underserved communities where I suspect these products may be more likely to be used. I am sure the interagency healthy homes work group (epa, hud, cdc, usda, doe and dol) will be interested since rodent control in affordable housing is an ever present challenge.
